PROFILE

Founder of FRAMFORM and digital producer with around seven years of experience in digital creation, project management and technology solutions. I lead work from research and concept through structure, design, development, testing and launch. My strength is combining clear communication with functional websites, customer journeys and responsible automation - always keeping people in control.

CORE SKILLS

- Digital production
- Web design & development
- UX & information architecture
- Customer journeys & automation
- Project management & quality assurance

PROFESSIONAL EXPERIENCE

FRAMFORM

2026-present

Founder & Creative Technology Lead · Sweden

- Building and leading a Swedish digital studio focused on web design, web development, customer journeys and responsible automation.
- Own the full delivery process: needs analysis, information architecture, creative direction, prototyping, development, testing and launch.
- Developed framform.se and a guided project flow with structured requirements capture, human review, data storage and email notifications.

Independent digital business

2024-present

Founder & Web Developer · legal name: Smart Art AI

- Develop and operate Elins val, a Swedish content and comparison platform with more than 300 published pages.
- Built a transparent scoring system with weighted criteria and a bounded digital advisory flow with clear safeguards.
- Automated structured content workflows and implemented technical SEO, metadata, schema and internal linking.

RSMH Fjällsjö

2017-present

Work Environment & Digital Solutions Specialist · Sweden

- Support coordination, clear communication and practical digital solutions in the association's day-to-day work.
- Built and maintain the website, room booking and food ordering flows with date, room and email logic.

Axiom Telecom / National General Insurance

2009-2015

Sales & Customer Advisor · Dubai, United Arab Emirates

- Built customer relationships through needs analysis, advisory service, solution sales and support across telecom and insurance.

Selected work & approach

Practical examples of how I combine design, technology and accountability.

DIGITAL STUDIO

FRAMFORM

A public Swedish studio designed to make digital projects clear from the first need through final delivery.

- Service pages, work samples and a guided project flow that captures goals, scope, materials and contact details in multiple steps.
- Next.js and React for the interface, Supabase for structured data, plus email notifications and human review in the process.
- Responsible automation supports the work while decisions, content and delivery retain a clear human owner.

PRODUCT & PUBLISHING PLATFORM

Elins val

A Swedish platform for guides, comparisons and clear product assessments across fitness, health and beauty.

- More than 300 published pages with structured navigation, metadata, internal linking and searchable information architecture.
- Transparent scoring system with weighted criteria and defined levels, without claims of first-hand product testing.
- A bounded digital advisory experience with safeguards for clearer guidance.

CONCEPT / DEMO

Premium Menu

A mobile-first menu prototype demonstrating category navigation, product presentation and a clear ordering flow.

- Created as a standalone demonstration of visual direction, responsive design and interaction design.

TOOLS & TECHNOLOGY

Next.js · React · JavaScript · Supabase · API integrations · structured data · technical SEO · responsive design · content architecture · automation

WORKING APPROACH

Research and needs analysis come first, followed by clear structure, prototyping, development and staged quality assurance. I document decisions, test the key flows and keep automation bounded so responsibility and control remain human.

EDUCATION & LANGUAGES

- Upper secondary education · Dubai
- Distance studies in Law, Syrian Virtual University · 2010-2013 · three years of study, no completed degree
- Arabic - native · Swedish - very good · English - very good
